PROFILE

UX Designer & Researcher with a background in anthropology, data analysis, and civic technology. I design clear digital experiences for complex, data-rich, and socially situated problems, from mobile apps to responsive web tools. Experienced in user research, participatory validation, wireframing, prototyping, visual storytelling, and translating research findings into usable product decisions. Interested in growing and learning within a product team by collaborating with designers, product managers, and engineers to build intuitive, consistent, and evidence-informed software experiences.

CORE SKILLS

UX/UI Design: user flows, wireframes, low- and high-fidelity prototypes, mobile app design, responsive web design, interaction design, usability improvements.

UX Research: user interviews, surveys, participatory workshops, qualitative research, usability testing support, research synthesis, user empathy.

Data-Informed Design: data cleaning, exploratory analysis, dashboards, maps, data visualization, evidence-based storytelling.

Collaboration: cross-functional teamwork, stakeholder communication, documentation, iteration based on feedback, time management.

Tools: Figma, Google Forms, Affinity Designer, Affinity, Adobe Illustrator, Adobe Photoshop, HTML, CSS, JavaScript, R, Python, QGIS, Flourish, Datawrapper.

SELECTED UX / PRODUCT PROJECTS

Tarpuy — UX/UI Designer

Lab TecnoSocial, Cochabamba Municipality, DAC, producer organizations · 2025

- Designed the UX/UI for a mobile marketplace app for consumers and a responsive web app for agricultural producers, helping connect local producers with consumers through clearer product discovery, reservations, order management, and sales workflows.
- Created user flows, wireframes, and high-fidelity prototypes in Figma for two complementary digital products with different user needs and levels of digital familiarity.

- Participated in validation workshops with producer organizations and translated feedback into interface improvements, including replacing administrative tables with more understandable product cards.
- Contributed to the product's visual identity and communication materials to support adoption and public communication.

Mi Huella App — UX/UI Designer & Illustrator

Lab TecnoSocial · 2025

- Redesigned a carbon footprint calculator for young users, transforming a form-based interface into a more guided, playful, and actionable mobile experience.
- Created wireframes, high-fidelity screens, illustrations, and a character system to help users understand their results and connect them with practical recommendations.
- Proposed features for storing previous measurements and visualizing progress, turning a one-time calculator into a tool for habit-building and environmental learning.

BiciDatos — UX/UI Designer

Civic technology project · 2024

- Designed a web and mobile civic technology product to help citizens access cycling information, participate in data generation, and support evidence-based mobility decisions.
- Worked on branding, UX/UI, and illustration for a product combining public participation, open data, and urban mobility.

Additional product design work: Mujeres Constructoras mobile app for Red Hábitat, PAP Sacaba health monitoring web/mobile app, and Arbu urban tree monitoring app.

PROFESSIONAL EXPERIENCE

UX/UI Designer & Digital Illustrator

Freelance / Lab TecnoSocial · 2021–Present

- Designed mobile and web applications for civic, environmental, health, and urban projects, combining UX/UI, branding, and visual communication.
- Collaborated with multidisciplinary teams including developers, researchers, communication specialists, NGOs, and public-sector partners.
- Produced user-centered interfaces, visual systems, and digital assets for products involving public participation, data collection, and social impact.

SELECTED RESEARCH & DATA VISUALIZATION WORK

Educational Inequalities in Bolivia's Scientific Olympiads · 2023

Built and cleaned a historical dataset of more than 3,000 records using R and Python;

identified relevant educational inequalities and presented findings through data visualization and scrollytelling.

Bolivia, the Country of Poisoned Land · 2023–2024

Created the visual identity, cover illustration, editorial design, and visual guidelines for an award-winning investigative journalism microsite on mining pollution in Bolivia.

3D Population Density Maps of Bolivia · 2023

Created 3D population density maps using R and Rayshader, combining data analysis, cartographic design, and visual composition.

EDUCATION

Diploma in UX/UI Design for Digital Product Development

Universidad Privada del Valle · 2025

Foundations of User Experience Design

Google / Coursera · 2021

BA / Licentiate Degree in Anthropology

Universidad Mayor de San Simón · 2021
